The “Your orders” function enables you to keep detailed track of all “Own orders” or “All orders” in a customer account. The selected orders are displayed in list format (maximum of 15 entries per page).

It is possible to limit your search to a specific period. The forward-back page arrows let you display additional results found. If you would like to resubmit a previously executed order in its entirety, this overview screen conveniently enables you to transfer that order back into your shopping cart. Just tick the checkbox next to the order you want to resubmit and then click on the “Selection in the shopping cart” button to whisk the past order back into your shopping cart. The *Status* column shows you the current status of the entire order. You can view more detailed information by clicking on the info icon.
